

Audio Conferencing

CloudSecure Audio Conferencing enables workforce based around the Globe to jointly communicate with each other via a single linked line. The service optimises business productivity by bringing people together for meetings, discussions, conferences and training, without the associated high costs of travel, venue and accommodation.

Your benefits...

Our Audio Conferencing service is straightforward, reliable and economical. Calls are available 24 / 7 / 365 and do not have to be pre-booked, allowing maximum flexibility and efficiency. Conferences can link up to ten people, regardless of the country they are calling from.

Access is via a 0870 or 080 (0800 or 0808) number in conjunction with a secure, permanently allocated PIN. There are no connection charges, set up costs or hidden charges, and no special equipment is required. The costs of external conference calls via 0870 can be shared equally between users, and internal conference call costs can be reduced and centralised by accessing via 080.

What we can do for you...

CloudSecure delivers your data, network, software and communications as managed services. Our hosted solutions in Security, Business Continuity, Voice, Messaging and Collaboration enable companies of all sizes to streamline business processes, excel in productivity and reduce operational costs.

Most importantly, our managed services give you the option to have the entirety or part of your IT taken care of, leaving you to concentrate on what is vital to your business - your customers.
